

How to Share a Draft Proposal

Copy the URL of the Draft while viewing it and send it to other users as needed. Since drafts save in real time, any changes made by someone will be reflected when you load the page.

The screenshot shows the 'New Edit Course - Curriculum' page on CourseDog. The URL in the browser bar is highlighted with a red box: `staging.coursedog.com/#/cm/form/tNckT2UKblgeoDuQFTBS/submit/KcEUKojLGyjLfOjYZai-2020-01-01-SU4w2WStOJ4K3ran19113875`. The page title is 'Joe Slone's Demo School'. On the left, a sidebar titled 'Curriculum Management' lists 'Home', 'Courses', 'Programs', 'Requirement Sets', 'Course Sets', and 'Proposals'. The main content area is titled 'New Edit Course' and includes a 'Pre-populate Data' section with 'COPY FROM PROPOSAL' and 'COPY FROM COURSE' buttons. Below this is a 'Content' section with a 'Description' field containing the following text: 'This is a more advanced version of 151, intended for students with greater mathematical maturity. In addition to t fitting, eigenvalues and eigenvectors, bifurcations and bistability in differential equations. Additional applications'.

It is recommended to still have the original creator of the Proposal be the one to submit the proposal once all of the suggested changes have been entered.
